

Grades K-1

Q&U SAY "I DO"

by Mrs. Kesler

This month we discussed how the letters Q and U must always be together! To really hit this concept home we had a wedding for Q and U! They were married and must always stick together! We had a Q bride and U groom, flower girls, ring bearers, bridesmaids, a best man and wedding cake! We had so much fun reviewing this topic!

FEBRUARY FUN

by Ms. De-Berry

February was definitely busy! We watched the groundhog see his shadow and keep the winter season going on longer. We celebrated Valentine's Day and wrote some letters to some special people. Throughout the month we learned about some important African American figures who made great, positive impacts in our world! We ended the month talking about presidents and their important roles in our country! We are ready for spring!!!

FIRST GRADE FUN

by Mrs. Reifsteck

First grade started February with "the best day ever". Our room transformed into Shady Pines Retirement home. The 100 year olds participated in a parade, physical therapy, a flu shot clinic, wheelchair races, an exercise time, an ice cream social and of course they had to visit the medication station a few times. We had the best time celebrating a great 100 days of school!

Grades 2-5

SHOWING THE LOVE

by Ms. Weaver

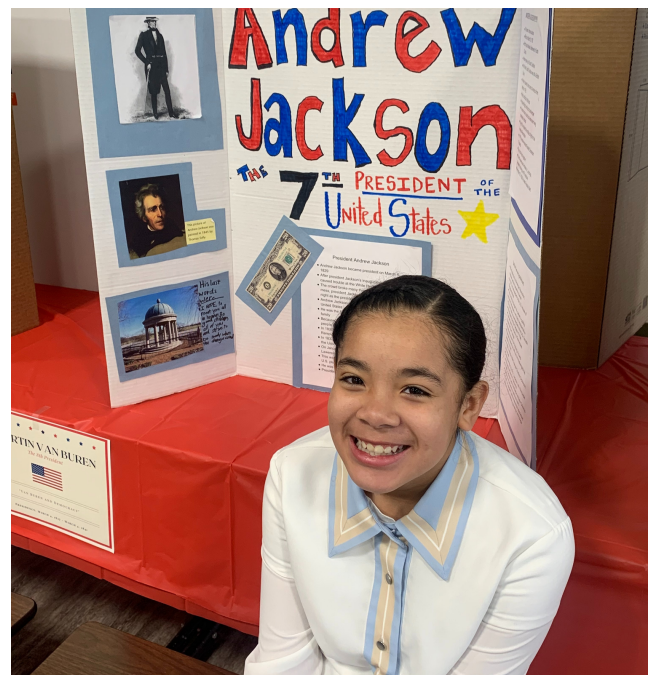

Second graders got to show the love in February. We hosted and distributed a mini fundraiser for the school called "Lolligrams" to show our friends and teachers how much they are loved. We were able to raise over \$600 for our school and can't wait to use it to celebrate this awesome school. Students also did research projects on BHM figures and dove deep into appreciating their stories.

PRESIDENTS' DAY CELEBRATION

by Mrs. Herrig

The 3rd, 4th, and 5th graders worked incredibly hard to put on our President's Day celebration! Each student chose a president, completed a research packet, and then created a poster independently. At the celebration, the students were able to teach parents and students all about the president that they researched. Presidents' Day was a great day to be at SCA!

FANTASTIC FRACTIONS

by Mrs. McGraw

The whole month of February Mrs. McGraw's math class has been learning about fractions. In this particular lesson, we learned about improper fractions and how to change them into mixed numbers. To convert an improper fraction to a mixed fraction, you divide the denominator by the numerator. The quotient becomes the whole number, the remainder will be the numerator, and the divisor becomes the denominator.
